Web Security and the Dark Web

Presented by Dan Konzen
University of Phoenix

Dan will present some of the highlights of his presentation he gave at the 90th EPT Anniversary Workshop held in Florida in 2019. He will provide an oversight of items we could do to secure our computer to the internet and briefly talk about the Dark Web.

Dan Konzen is an esteemed educator and corporate leader with over 25 years of strategic leadership, organizational change, and project management with broad experience in all aspects of financial, risk, knowledge management, and the strategic development, implementation, and application of innovative technology solutions for multiple organizations in both profit and non-profit sectors. Mr. Konzen has direct experience with strategic corporate governance, application systems and database development, content management system development and implementation, enterprise resource planning applications, administrative and financial software implementation, financial consulting, litigation and claims management, profitable underwriting, course design and development, knowledge and learning management, and faculty mentorship and administration. Mr. Konzen is a Certified Advanced Facilitator and currently serves as the Campus Chair, College of Information Systems and Technology and Chair, Scholarship Committee Editorial Board for the University of Phoenix.

Epsilon Pi Tau Connection

Dan was the founding Trustee of the Delta Sigma Chapter at the University of Phoenix and currently is the President of the Chapter.
